PROFILE

Computer and Communications Systems Engineering graduate from UPM CGPA 3.40 seeking to build a career in Islamic banking through Bank Islam's Young Leaders Programme (YLP). Equipped with strong data analytics and systems-thinking skills from a dual-department internship at MAHB spanning Business Intelligence and Electrical Engineering with hands-on experience in dashboard development, workflow automation, and operational digitisation. Final Year Project AI-powered flood early warning system was selected to represent UPM at the MADANI Festival of Ideas 2026 before national ministers and showcased at the Vice-Chancellor's Annual Address 2026. Commissioned as Leftenan Muda Simpanan (PALAPES Darat) with proven excellence in leadership, discipline, and national-level competitive sports.

EDUCATION

Universiti Putra Malaysia (UPM) *October 2022 – August 2026*
Bachelor of Engineering (Hons.) in Computer and Communications Systems Engineering
CGPA: 3.40

Pusat Asasi, Uitm Kampus Dengkil *January 2021 – December 2021*
Foundation in Engineering
CGPA: 4.00

INTERNSHIP & WORK EXPERIENCE

Industrial Trainee (Dual Department) — Malaysia Airports Holding Berhad (MAHB) *July 2025 – September 2025*
Sepang, Malaysia

- **Business Intelligence Department (Data Analytics):** Developed a paperless tender submission app using Google AppSheet reducing manual verification by ~40%, redesigned the engineering division's website to streamline coordination for 50+ staff, and built operational dashboards using Google Data Studio to consolidate real-time data across all 39 MAHB-managed airports nationwide.
- **Baggage Handling System (BHS) Engineering Department (Electrical):** Supported the electrical maintenance team in PLC programming, motor troubleshooting, and real-time breakdown response across KLIA's 4-terminal baggage handling system digitised 100% of scanner/reader machine data into structured reports, accelerating fault-trend analysis by ~35%.
- Gained first-hand exposure to professional engineering workflows collaborating with engineers, architects, and technicians, attending high-level management meetings, and coordinating vendor procurement and securing processes across both departments.
- Tools used: AppSheet, DataStudio, PLC Programming, HTML/CSS, Google Workspace, AppScript, Sheets, Words.

PROJECTS

EYER: AI-Powered River Surveillance and Flood Early Warning System - FYP *2026*

- Achieved ~86% calibration accuracy against real-world sensor benchmarks by developing an AI-powered water velocity monitoring system using the Farneback optical flow algorithm (OpenCV), in collaboration with Jabatan Pengairan dan Saliran Malaysia (DID), addressing limitations of legacy physical sensors for real-time flood early warnings.
- Enabled natural-language querying of river conditions and predictive flood alerts by integrating a locally hosted AI chatbot using RAG + Llama 3B, trained on hydrological data provided by DID.
- Won Gold Medal at ICCEX 2025 and presented at Festival of Ideas 2025 under Program Pendidikan MADANI representing UPM. Subsequently selected to represent the Faculty of Engineering at UPM Vice-Chancellor's Annual Address 2026.
- **Technical stack:** Python, Java, OpenCV, Farneback Optical Flow, Node.js, HTML/CSS, RAG, Llama 3B, Linux

Self-Hosted Machine Learning Operation Pipeline via (RHEL) - Personal *2026*

- Achieved sub-200ms inference latency and 99% uptime by architecting an end-to-end MLOps system on Red Hat Enterprise Linux 9, featuring containerized ML model serving, CI/CD automation, and production monitoring
- Reduced kernel size by ~15% while maintaining full functionality by manually compiling and customising the Linux kernel from upstream source, optimising system performance for ML workloads.
- **Technical stack:** RHEL 9, Python, FastAPI, Podman, GitHub Actions, PostgreSQL, Nginx, Prometheus, Grafana, AWS, Virtual Machine

TECHNICAL SKILLS

Programming Languages: Python, C/C++, Java , JavaScript, Assembly Language, HTML/CSS

Networking & Communications: TCP/IP, OSI Model, GNS3, Wireshark, VLAN, Routing Protocols, LTE/5G fundamentals

Tools & Platforms: Git, GitHub, Linux, Docker, VS Code, MATLAB, Simulink, AWS (basic), Firebase

Databases: MySQL, JSON, Vector Databases (RAG)

Hardware & Embedded: Arduino, ESP32, Raspberry Pi, Multimeter, Oscilloscope, FPGA Board

Soft Skills: Team Leadership (Palapes), Presentation (pitched to national Ministers & KSU Negara), Cross-functional Collaboration, Team Management (Rowing Club President), High-pressure Decision Making, Resilience & Discipline (National Athlete)

CERTIFICATIONS & AWARDS

- Gold Medal, ICCEX 2025 — EYER: AI-Powered River Surveillance and Flood Early Warning System (Final Year Project)
- Mastering AI & Practical Data Science for Professionals — PENERAJU / Utechtium Sdn Bhd (May 2026, In Progress)
- Gold Medal, Dodgeball — Putrajaya National Games (Representing UPM), 2022–2025
- Bronze Medal — Penang Rowing Indoor Championship 2022

LEADERSHIP & ACTIVITIES

Leftenan Muda Simpanan PALAPES Darat (Army Reserve Officer Training Corps) *2022 – 2025*

- Successfully completed the 3-year Pasukan Latihan Pegawai Simpanan (PALAPES) Darat officer training programme a selective Ministry of Defence programme combining academic studies with tactical, physical, and leadership training.
- Commissioned as Leftenan Muda Simpanan after passing all officer cadet assessments including field exercises, weapons handling, map-reading, and command evaluations.
- Developed and applied skills in leadership under pressure, disciplined decision-making, logistical planning, and team command all while maintaining academic standing in a demanding engineering degree.

President — UPM Rowing Club *2022 -2024*

- Led the UPM Rowing Club, overseeing training schedules, competition entries, athlete welfare, and administrative coordination with the UPM Sports Unit.
- Represented the club in competitive fixtures while simultaneously managing executive responsibilities balancing athlete and administrator roles.
